BLUNA LACCATO LUCIDO

BLUNA

LACCATO LUCIDO

29

La trasversalità del modello Bluna è espressa in questo ambiente mediante una sapiente miscela di materiali riflettenti e superfici materiche per un connubio unico. Gli arredi di questo spazio si sviluppano attorno ad una parete di forma sinusoidale e determinato uno spazio vivibile a 360°. Nella prima area si sviluppa un angolo living costituito a destra da vetrine con funzione bar per poi proseguire con basi basse in laccato lucido con sistema zenit e boiserie leaf con mensole sfalsate. La parete prosegue con colonne che si raccordano ad una zona cucina con ante retrattili di modo da confondersi in uno spazio lineare e fluido. A completare lo spazio intervengono la madia ed in coffe table sempre nelle stesse finiture. The transversality of the Bluna model is expressed in this environment by a wise mixture of reflective materials and material surfaces for a unique connubio. The furnishings of this space develop around a sinusoidal wall and determined a livable 360° space. In the first area there is a living angle consisting of the right from showcases with bar function and then continue with low bases in glossy lacquered with zenit system and leaf boiserie with staggered shelves. The wall continues with columns that are linked to a kitchen area with retractable doors so as to be confused in a linear and fluid space. To complete the space spoke the sideboard and in coffe table always in the same finishes.
