Un ambiente che mette in relazione gli spazi della casa, eliminando la separazione tra zona soggiorno e cucina. Grazie all'uso delle colonne pilastri, elementi verticali contenitivi e funzionali, ogni ambiente si sviluppa in aree delimitate ma aperte, simili a spazi teatrali, di ampio respiro. Due materiali innovativi caratterizzano la composizione: da una parte, il laccato metal 4.0 che riveste le basi sospese ed esalta la modernità dell'insieme, dall'altra le vetrine illuminate sullo schienale che creano uno spettacolare effetto di rilievo. Librerie ancorate tra terra e soffitto caratterizzano l'ambiente e vanno a dividere la zona pranzo dall'ambiente circostante. An environment that connects the spaces of the house, eliminating the separation between the living area and the kitchen. Thanks to the use of pillar columns, vertical containing and functional elements, each room is developed in delimited but open areas, similar to theatrical spaces, with a broad scope. Two innovative materials characterize the composition: on the one hand, the 4.0 metal lacquer that covers the suspended bases and enhances the modernity of the whole, on the other hand the illuminated display cabinets on the back create a spectacular relief effect. Bookcases anchored between the ground and the ceiling characterize the environment and divide the dining area from the surrounding environment.
