MANTIS + LAB

MANTIS + LAB

47

Un ambiente che celebra la tecnologia dei materiali, da un lato Mantis con ante spessore 12 mm in legno spina di pesce e cuore in alveolare di alluminio per estendere i frontali oltre i limiti ordinari mentre dall'altro Lab con ante in telaio di alluminio capaci di sostenere lastre di gres nella parte frontale. La parete living è connotata da 3 elementi fondamentali, a sinistra le colonne alte interrotte dalle vetrine reflex, a destra una linea sottilissima rappresentata dalle basi in gres ed i moduli folding, mentre in alto i pensili in alluminio riflettente in total look con i riflessi del gres finitura pietra. A seguire si snoda la zona pranzo con tavolo e due madie alte ad uso bar. La continuità degli ambienti diventa logica, mentre l'espressione della tecnologia arriva persino ad alleggerire il metallo, rendendo l'insieme degli elementi più raffinato e al contempo più forte e persistente. An environment that celebrates the technology of the materials, on one side Mantis with 12 mm thick door in wood plug and heart in aluminum alveolar to extend the fronts beyond the ordinary limits while on the other lab with doors in aluminum frame capable of Support stoneware plates in the front. The Living wall is connoted by 3 fundamental elements, on the left the high columns interrupted by the SLR showcases, to the right a very thin line represented by the bases in stoneware and folding modules, while in high the reflective aluminum wall units in total look with the reflections of the Stone finish stoneware. Following is the dining area with table and two high machines for bar use. The continuity of the rooms becomes logical, while the expression of technology even comes to lighten the metal, making the whole elements more refined and at the same time stronger and persistent.
